Customer Support Engineer at Applanix / Trimble

My PhD experience at:

GFZ (2012 - 2015)

My Postdoc experience at:

-

Ask me about:

In-Line Inspection of Pipelines, Mobile Mapping Systems

Contact via:

cfeld@posteo.de

Dr. Christian Feld

What I enjoy most about my job:

Variety of different tasks, eg. finding solutions for complex issues followed by the great feeling of supporting the customer to get their job done.

As a bigger picture, my work has the purpose:

Finding technical solutions for mobile mapping customers and support them in their application, eg. Aerial photography, Airborne Laserscanning, Road Surface Mapping, Indoor Mapping,...

Common biased opinion about my work field:

A skill-set I think is useful for a position like mine:

Problem solving under time pressure. Customer service oriented attitude.

A crucial factor to get my current job:

Work experience as a data analyst and support engineer.

My recommendation to a postdoc aiming for a career outside academia:

Be open minded for different application areas, new tasks and be prepared to work in a completely new environment (industry sector) outside the usual academic field of work of a geoscientist.
